Home Economics

Verna Fix — Home Economics

Some people think the best part of Home Economics is cooking and baking. What can compare with the inviting aroma of warm cinnamon rolls on a winter day, except perhaps the sampling of the product? To me, however, nothing can compare to the finer arts of stitchery. Turning in the door armed with needles, threads, and most important of all, that ugly little tool the seam ripper, full of excitement over my newest pattern and material, I groan to find my three partners bought the same thing. Countless times I have threatened to throw my sewing machine out the window, but last year the school board took heed and kindly bricked them up. Putting in a zipper upside down or backwards may not be unique, but how about doing both — twice? Now, where is that seam ripper?

Marching to the beat of your own drum is not the philosophy of a true musician. How far you get depends on your split-second timing, concentration and memorization. Teamwork is part of the formula that makes our music department famous and respected. The rest of the formula calls for a top notch staff named — Mr. Michaelson, Mr. Schaff, and Mr. Matthias. Put it together, and you're bound to succeed!
